

Brand: Ranger
Model: RST-2TCB
Description: Floor Jack Cross Beam

Use this floor jack cross-beam to lift the entire front, rear or sides of a vehicle with greater stability and less chance of undercarriage metal deflection.

- Provides additional stability
- Use with any floor jack with a 1 1/8" diameter saddle stud
- Saddles adjust from 23" to 32" on center
- Fits most standard floor jacks
- Threaded pad design provides an additional 2" adjustment
- Rubber lift pads for better stability
- Lifts FWD vehicles without axle beam
- Use to lift cars at rocker panels for simultaneous wheel service
- Heavy steel construction for maximum durability
- Lifting capacity: 4,500 lbs. / 2000 Kg.
